

FORM 5-5: INSTRUCTIONS FOR REQUEST FOR ADDITIONAL CLASSIFICATION

Request for Authorization of Additional Classification and Rate Info and Instructions

The U.S. Department of Labor (DOL) issues wage determinations under the Davis-Bacon Act (DBA) using available statistical data on prevailing wages and benefits paid in a specific locality. On occasion, the data does not contain sufficient information to issue rates for a particular classification of worker needed in the performance of the contract. Because of this, DBA provisions contain a conformance procedure for the purpose of establishing an enforceable wage and benefit rate for the missing classification.

If a classification considered necessary by the contractor for performance of the work is not listed on the applicable wage determination, the contractor must initiate a request for approval of additional classification along with the proposed wage and benefit rates for that classification. The Prime Contractor initiates the request by preparing an SF-1444, Request for Authorization of Additional Classification and Rate. The Contractor completes blocks 2 through 15 on the form.

The Contractor submits the request to the local government Grantee. The Labor Standards Officer (LSO) will review the form and the required documentation. The LSO then submits the proposal with all the attachments to DOL for approval. This process can take up to 30 days.

DBA Facts

- The classification must be appropriate for the contract work and must be a classification that is utilized in the locality by the construction industry.
- The contractor cannot propose a new classification by combining job duties from two or more existing classifications on the wage determination or propose a new classification that performs only part of the duties of an existing classification.
- The proposed wage rate for the new classification should generally be no lower than the wage rate of the lowest skilled classification on the determination.
- Conformance requests should not be submitted for exempt classifications (project managers, full-time supervisors, professionals such as engineers), nor for classifications other than “laborers or mechanics” employed on the site of work, as covered by DBA.
- The proposed rate should bear a reasonable relationship to the wage rates listed on the wage determination.
